SOFTWARE ENGINEER

Mueang Nonthaburi, Nonthaburi | 063-225-0016 | sun.jrp@gmail.com |  jirapath-cha

Backend Software Engineer with 4+ years of experience building Java Spring Boot microservices, REST APIs, batch processing, CI/CD pipelines, and performance-tuned backend systems for banking and enterprise platforms. Experienced in Redis, SQL/NoSQL databases, Docker/Kubernetes, AWS and cross-team API integration.

SKILLS

Backend	Java, Spring Boot, REST APIs, Microservices, Performance Tuning
Databases	SQL Server, PostgreSQL, MongoDB, Redis, Elasticsearch
Cloud/DevOps	AWS, Docker, Kubernetes, Jenkins, CI/CD, Git

EDUCATION

Bachelor of Engineering 2018 – 2022
Major : Computer Engineering
King Mongkut's University of Technology North Bangkok

EXPERIENCE

Senior Associate Software Engineer Nov 2024 – Present
TMBThanachart Bank PCL

- Delivered and maintained customer-facing Mobile Banking features on Java Spring Boot microservices serving 1 M+ users, ensuring reliability and maintainability across large-scale distributed systems.
- Optimized API response time by 70% on large-payload requests, and streamlined Jenkins CI/CD pipelines – improving delivery efficiency and backend service performance.
- Led the Spring Boot 3 → 4 migration across 40 microservices, ensuring framework and dependency compatibility while minimizing production risk and downtime.
- Built internal Python automation tools (log analysis, Git workflow automation, migration utilities, AI RAG) that accelerated delivery and reduced manual engineering effort.

Java Software Engineer Dec 2022 – Nov 2024
Krungthai Bank Public Company Limited

- Designed and implemented Java Spring Boot RESTful High-Performance APIs for an internal financial application.
- Developed a reliable Go batch processing for data import/export and user notifications, improving data handling and operational workflows.
- Collaborated with over 10 banking service teams to design, implement, and integrate APIs for seamless data exchange across departments, enhancing operational efficiency and reliability.

Software Developer May 2022 – Nov 2022
Sirisoft Public Company Limited

- Developed modern NoSQL applications using Java, Spring Boot, and Kafka, fostering efficient development and testing processes for Online Marketplace clients.
- Designed infrastructure, developed backend and maintained internal Timesheet project using Java Spring Boot, Docker, CICD, API gateway and AWS.

Full-stack Developer (Intern) Jun 2021 – Apr 2022
Krungthai Panich Insurance Public Company Limited

- Designed and developed a notification system on GCP to notify customers, built and designed API from business logic, and prepared documentation.
- Cleaned and analyzed business data using Python.
- Automated web service testing and load testing with Selenium and JMeter.
